

WHY SELECT TGA?

- TGA uses a risk-based approach when conducting loan review...which means we only review what we need to review with focus on higher risk loans.
- We have a proprietary risk rating methodology (used for nearly 40 years) that ensures risk rating assignments are transparent and consistent.
- Our Loan Review System (LRS) allows us to share with our clients immediate access to risk ratings being assigned, so risk rating differences can be resolved in real time...not 60-90 days after field work is completed.
- Our LRS makes assignment of risk rating efficient by structuring the process, allowing us to save our clients fees and expenses.
- Our Reviewers are all W-2 employees and have extensive experience in commercial lending.
- Our reports are designed to help our clients understand, measure, monitor, and control risk, to the point where you will know if it's prudent to make the next loan.
- Our Individual Relationship Review Reports are designed to help Loan Officer easily identify the risks within the Relationship, so effective strategies can be formed.
